Checklist + Flow-Procedure Boeing 737 NG -600/-700/-800/900 PMDG 737NGX Created by C. Rau (www.CarstenRau.de) Page 2 ##### To start with a dark & cold cockpit, you need to set the aircraft to dark & cold in the FMC and activate dark and cold for every startup.

Boeing 737 NG Checklist / Flow-Procedure
RE: PMDG 737 NG Engine start When you start a 737, you have to have the APU bleed ON, and the packs OFF (its an air-driven starter - min 30 psi). You'll find the sim is just like real life. If you do this, it works as expected.

PMDG 737 NG Engine start - flightsim.com
In our company (And boeing's FCOM), engine start is ended after the start limit EGT line (725C) disappear (We will call "Engine stable", but not by FCOM). It's about 5 second after start cutout. So I still need to monitor the OIL PRESS on lower DU at that time, thus the current setting is a little bit annoying.

Boeing 737-800 Procedure Checklist - Kennar
The Boeing 737 NGX PMDG is very realistic, specially his behavior, and now you'll ask me how can I say it if I even don't fly a real aircraft, that's why I'm reading the manuals and trying actions according it.

Boeing 737NG crossbleed engine start - PPRuNe Forums
RE: PMDG 737 NG Engine start The reason you need the APU bleed open is because you need air to start, they're not electric starters. Take a look at the overhead panel, follow the bleed lines, the APU will provide bleed air to the #2 engine for starting if you have the iso valve open.
