Powering the Boeing 737 Next-Generation family. The CFM56-7B is the exclusive engine for the Boeing Next-Generation single-aisle airliner. In total, over 8,000 CFM56-7B engines are in service on 737 aircraft, making it the most popular engine-aircraft combination in commercial aviation.

CFM56 - CFM International Jet Engines CFM International

StandardAero's Turner focuses attention on the CFM56-7B for the 737NG family. "This is subject to the same kind of regular maintenance as many other engines: oil servicing, borescope and visual inspections. As the engine ages, additional field-level inspections come up on the fan blades and turbine rear frame.

Supporting the CFM56 engine family and LEAP engine range

With more than 33,000 delivered to date, CFM56® engines mainly power single-aisle commercial jets from Airbus and Boeing. The CFM56®, developing 18,500 to 33,000 lb of thrust, sets the standard in this market. It owes its impressive success to exceptional performance and reliability, the result of the two partners' technical excellence. The CFM56® offers dispatch reliability

CFM56 | Safran Aircraft Engines

example, there are more than 35 engine shops with CFM56-7B overhaul capability, and significantly fewer for the CF6 or GE90" An evaluation of the widebody engine market must take into account the level of OEM aftermarket involvement, the number of MRO shops in its immediate network, the number of SVs being carried out annually, and the
