'Life on Earth' , is a 'novel graphic' (as described by its publisher) that takes place on the planet Glargalia. The narrator is a scientific advisor to King Floorsh, who is explaining to the King and his son Prince Floorsh about the way life began on Earth and perpetuated into the present, with a special chapter on humanity itself.

**Earth | Britannica**

Monkeys to humans, the evolution of life is a story with surprising twists. Earth has been home to over five billion different species of organisms. Of all of those living life forms, an estimated 99% of all species are now extinct. We, humans, are currently sharing the earth with about 12 million other species.
