If you want to fit more into your frame, you might want to look into wide-angle focal lengths: 14mm, 20mm, 24mm, 28mm, and 35mm. On the other hand, if you want to get as close as possible to your subject, go for a telephoto lens with focal lengths that usually range from 50 to 100mm.

## **How to Choose Your First Lens: Buying Guide for Beginners ...**

The best camera lenses may only be available to you for specific focal lengths, which will mean you'll have to decide between image quality and the ability to switch between lens magnification. Focal length is a big deal for storytelling, so it isn't an easy decision.

## **How to Choose the Right Camera Lenses - Complete Buying Guide**

Before buying any lens, you should find out your camera's crop factor and use it to calculate the lens's effective focal length. For example, a 50mm lens will have an effective focal length of 75mm when used on a camera with a 1.5x crop factor. Although the focal length remains the same, the angle of view is reduced by the smaller sensor.
