Technical Data - Link-Belt Cranes

TRUMBULL TELESCOPING VALVES are designed to regulate the level of fluids in containment structures such as holding chambers, tanks, ponds & lagoons. An example of an application might be to regulate the effluent level in a settling basin. Also known as "Sludge Draw-Off Valves" or "Decanting Valves", the valve assembly consists of a lifting mechanism (operator), connecting stem and a slip (drain) tube which travels vertically inside a fixed vertical pipe.

Telescoping Valves - Trumbull Manufacturing, Inc.

retractable seat belt. Four- way adjustable tilting- telescoping and locking steering wheel. All windows are tinted and tempered safety glass. Slide by door opens to 3' (0.91 m) width. Sliding rear and right side windows and swing up roof windows for maximum visibility and ventilation. Engine dependent warm- water heater with defroster.
