Lighting pattern - A lighting pattern is a specific technique in which a light is placed in a prescribed manner for predictable and established results. Examples of these include butterfly lighting, Rembrandt lighting, and split lighting. PC Sync Socket/Cable - The PC sync is a means to connect your camera to a flash with a cable.

Your Guide to Studio Lighting Equipment

2. Loop Lighting. Loop lighting is made by creating a small shadow of the subjects noses on their cheeks. To create loop lighting, the light source must be slightly higher than eye level and about 30-45 degrees from the camera (depends on the person, you have to learn how to read people's faces).

6 Portrait Lighting Patterns Every Photographer Should Know

Loop lighting is pretty much my go-to when creating light. With loop lighting, the light is about 45 degrees to the side and slightly above eye level. This position of the light creates a shadow just under and to the side of one nostril and the nose. This is a flattering type of light on most everyone.

Studio photography lighting, such as the flash and on-camera lights, can be confusing, especially if you're new to the hobby. A camera flash provides a quick but powerful burst of light that works simultaneously with the camera shutter. It enables you to shoot photos wherever, whenever, and however you want without the need for a separate ...

Photography Lighting | Studio Lighting for Photography | B ...

Take readings of the highlight and shadow areas. The difference between them is the contrast range, typically referred to in the number of f/stops difference. If the shadows read 1/125 sec. @ f/4 and the highlights read 1/125 @ f/16 the contrast range is four stops. I rarely care about the specific number of stops.
